

Cool, Fast, Quiet.

## StoreJet™ 35 *Ultra*

External Hard Drive

Transcend's StoreJet™ 35 Ultra external storage device is the ultimate way to add an extra SATA hard drive to your computer for downloading, storing, transferring and backing up your data. With high-speed eSATA and USB 2.0 connection options, the StoreJet 35 Ultra guarantees both speed and compatibility.

While most 3.5" external hard drives are prone to data-loss and drive failure due to overheating, the StoreJet 35 Ultra features an efficient active cooling system that includes a silent 80mm high-flow fan to keep your drive running cool and stable. Also included in the StoreJet 35 Ultra package is Transcend's incredibly useful StoreJet™ elite intelligent backup software.
