

miniSDHC™ / miniSD™ / microSD™ Cards

Your Tiny Mobile Partner

To meet the ever-demanding need for high-capacity storage in portable devices like mobile phones, PDAs, GPS navigation, and PMPs (Portable Multimedia Players), Transcend offers a wide range of small form-factor flash memory cards. These include **miniSDHC**, **miniSD** and **microSD** cards that are all tiny in size but deliver superior performance.

Even with compact footprints as small as 40% (**miniSDHC** and **miniSD**) or just 20% (**microSD**) of a full-size SD card, Transcend's little flash cards deliver the same reliable performance as standard SDHC or SD cards. Now you can enjoy hours of mobile entertainment – from your favorite videos and photos to music and games – anytime, anywhere. Never worry about storage space on your mobile device again.
